Safer Internet Day

We have celebrated Safer Internet Day in school this week, the slogan this year has been, **'Together for a Better Internet'**.

This has been a fantastic opportunity to engage with our

children and find out about their digital lives. To help you talk to your children about having a positive and safe time online, the UK Safer Internet Centre has created a pack for parents and carers, including conversation starters, a factsheet, family pledge card and lots more. You can find this online at:

Digital Wellbeing

Our young children are growing up in a technological world, that is exciting and ever changing. However it can be very challenging at times and this can have a negative impact upon your child's wellbeing. Childnet has produced some excellent guidance to help you support your child at home.

School Life

As a reminder, we ask you to avoid negative postings about school life on social media. We do have an open door policy and as a parent, if you are concerned about an aspect of your child's education we ask that you speak to a member of staff. Posting comments on social media about the school, staff and children should be avoided at all times. Negative postings about the school can impact on the reputation of the whole school community. Posting threatening, obscene or offensive comments about the school online can be considered as a criminal offence and can therefore have serious legal consequences.
